            ABOUT PROJECT
        </h3>
        <div class="line"></div>
    </div>
<div class="body">
<div class="left">
    <h2>Problem:</h2>
    <p>
        Swimming is one of the best exercises that helps people to reduce stress in
this urban lifestyle. Swimming pools are found larger in number in the hotels,
weekend tourist spots and barely people have in their house backyard. Beginners,
especially often feel it difficult to breathe under water and causes breathing
trouble which in turn cause a drowning accident. Worldwide, drowning produces a
higher rate of mortality without causing injury to children. Children under six of
their age are found to be suffering the highest drowning mortality rates
worldwide..Such kinds of deaths account for the third cause of unplanned
death globally, with about 1.2 million cases yearly.

    </p>
</div>
<div class="left">
    <h2>Solution:</h2>
    <p>
        To overcome the conflict, a meticulous system is to be implemented along
the swimming pools to save the human life. By studying body movement patterns and
connecting cameras to an artificial intelligence (AI)system we can devise an
underwater pool safety system that reduces the risk of drowning. Usually such
systems can be developed by installing more than 16 cameras underwater and ceiling
and analysing the video feeds to detect any anomalies . but AS a POC we make use
of one camera that streams the video underwater and analyses the position of
swimmers to assess the probability of drowning ,if it is higher than an alert will
be generated to attract lifeguards attention.

    </p>
</div>
</div>
<div class="bottom">

```

```

        <p ><b>
            Note : The system is not designed to replace a lifeguard or other
            human monitor, but to act as an additional tool. "It helps the lifeguard to detect
            the underwater situation where they can't easily observe.
        </b></p>

    </div>

```

```

<div class="body">
<div class="left">
    <p>
        Swimming is one of the best exercises that helps people to reduce stress in
        this urban lifestyle. Swimming pools are found larger in number in the hotels,
        weekend tourist spots and barely people have in their house backyard. Beginners,
        especially often feel it difficult to breathe under water and causes breathing
        trouble which in turn cause a drowning accident. Worldwide, drowning produces a
        higher rate of mortality without causing injury to children. Children under six of
        their age are found to be suffering the highest drowning mortality rates
        worldwide..Such kinds of deaths account for the third cause of unplanned
        death globally, with about 1.2 million cases yearly.
